Portfolio: paramanantham.vercel.app

Professional Summary

Full Stack Developer with approximately 2 years of hands-on experience building production enterprise applications, including large-scale enterprise migration platforms and a production genomics-based healthcare platform. Experienced across React, TypeScript, Node.js, Python/FastAPI, REST APIs, PostgreSQL, and SQL Server, with exposure to AWS and Azure. Skilled in implementing authentication with AWS Cognito, real-time communication using WebSockets and Server-Sent Events (SSE), and integrating third-party systems into scalable, maintainable applications.

Technical Skills

Backend:	Node.js, Express.js, Python, FastAPI
Languages:	JavaScript, TypeScript, Python
Frontend:	React, TypeScript, Tailwind CSS, HTML, CSS
Databases:	PostgreSQL, pgAdmin, Microsoft SQL Server, SSMS
Cloud & DevOps:	AWS (Cognito, Bedrock), Microsoft Azure, Azure Repositories, CI/CD pipelines, DevSecOps
APIs & Real-Time:	REST APIs, WebSockets, Server-Sent Events (SSE)
Tools & Practices:	Git, GitHub, Playwright, PowerShell, RAG, Agentic AI

Professional Experience

ZEB (sister company of AVASOFT) - Chennai, India

Analyst (Full Stack Engineer function)

May 2026 – August 2026

Project: Genomics-Based Healthcare Platform - medication recommendations based on genetic conditions

- Personally developed 100+ application modules and 300+ production screens using React, TypeScript, and Tailwind CSS.
- Integrated 200+ APIs across frontend and backend workflows, combining REST API communication, WebSocket two-way channels, and SSE one-way real-time data streaming.
- Implemented client-side authentication and authorization using AWS Cognito.
- Integrated, validated, and debugged backend services built with Python and FastAPI, developing a strong working understanding of the codebase and service flow; worked with PostgreSQL and pgAdmin for data management.
- Integrated AWS Bedrock to support AI-driven capabilities within the platform.
- Integrated third-party systems and services, including Convesio Pay, Swell, Pharmacy Profile, EPIC EHR, and LiveKit.
- Participated in technical solution discussions, converting business requirements into scalable technical implementations.
- Focused on application structure, reusable code, maintainability, and code quality.
- Performed debugging, integration, and issue resolution, contributing to a successful production launch.

AVASOFT - Chennai, India

Migration Engineer

March 2025 – March 2026

Project: Slack → Microsoft Teams Enterprise Migration Platform

- Worked as a Full Stack Engineer across frontend, backend, and database components of a production application migrating Slack conversations, files, and related data to Microsoft Teams, as part of a 5-member engineering team.
- Built frontend features using React and TypeScript, and backend services using Node.js and TypeScript.
- Worked with SQL Server/SSMS for data storage and Microsoft Azure for cloud infrastructure.
- Developed REST APIs supporting migration workflows, data processing, and third-party integrations.
- Engineered a custom export mechanism to work around Slack API rate limits, optimizing inventory scan speed and enabling parallel migration processing.
- Supported migrations covering approximately 500 users, 100,000+ conversations, and 2+ TB of data, completing within planned timelines with zero throttling incidents.

- Participated in troubleshooting, performance optimization, and production support.

Project: Teams → Teams Migration Platform

- Worked as a Full Stack Engineer on a Teams-to-Teams migration solution, focusing on SharePoint migration functionality.
- Developed frontend and backend components using React, TypeScript, Node.js, SQL Server, and Azure.
- Built migration workflows, data handling logic, and API integrations; built and validated the solution in a non-production environment.

Trainee Engineer

September 2024 – March 2025

- Developed practical full-stack development skills using React, TypeScript, JavaScript, Node.js, and Express.js.
- Worked with Microsoft SQL Server and SSMS, building an understanding of frontend architecture, backend services, REST APIs, and database integration.
- Used Git and GitHub for source control and collaborative development.

Selected Personal Projects

Personal Portfolio - React, TypeScript, HTML, CSS, JavaScript

- Built a personal developer portfolio showcasing skills, professional experience, and projects.

Ticket Booking Application - React, TypeScript, Node.js, REST APIs, Database

- Built a full-stack ticket booking application implementing booking workflows, APIs, and data management.

AI Chatbot - React, TypeScript, Node.js, AI APIs

- Built an AI-powered conversational application integrating frontend, backend, and AI capabilities.

Education

Bachelor of Science (B.Sc.) - Computer Science

2020 – 2023

Government Arts & Science College, Kadayanallur - 84%
